

Get Charged Up With These Facts

Phone and laptop chargers in the UK left plugged in unnecessarily waste over £60 million and emit 250,000 tonnes of carbon dioxide every year!

How you can help

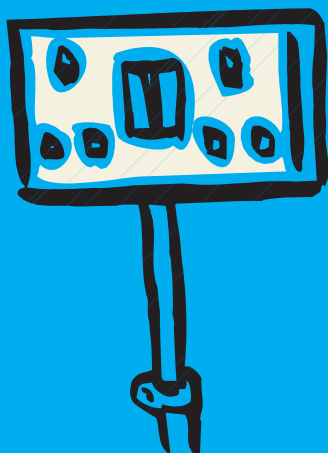

- Unplug your mobile phone or battery charger when not in use
- If accessible switch off at the socket

Did you know?

95% of the energy used by mobile phone chargers in the UK is wasted energy?

Only 5% is actually used to charge phones and the rest is wasted!
